Description

This 2023 Tesla Model 3 Long Range is an electric vehicle that has been kept by only one owner from new. As a Long Range variant, it is designed to offer a balance of performance and efficiency, powered by a 78 kWh battery. This model is well suited for those looking for a modern electric car with a proven history of single ownership., The standout feature of this vehicle is its impressive maximum range of 394 miles when new, which allows for significant travel between charges. Charging is flexible, taking 12 hours for a full charge at home using a 7kW charger, or as little as 25 minutes to reach 80 percent capacity at a fast public charging station. Practicality is enhanced by a large boot space, while safety and convenience are supported by features such as Blind Spot Warning with Blind Spot Assistance, Multi-Collision Braking, and Brake Disc
